INDICATIONS:

- Neck sprains and strains
- Post-surgical cervical support
- Management of stable injuries, as medically prescribed
- Cervical spondylosis, mild cervical instability, cervical muscle weakness

KEY FEATURES:

- Adjustable traction for secure support
- Adjustable diameter and neck angle
- Adjustable height (back panel)
- Comfortable, breathable and lightweight
- Cushioned and easy to clean
- Quick and easy application and removal

SIZE:

Universal

WHAT ARE CERVICAL COLLARS?

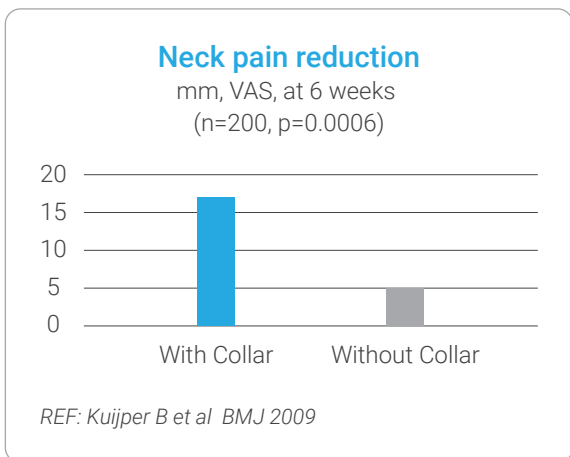

Cervical collars are wearable devices that provide effective neck support and stabilization after injury, surgery, or in other chronic conditions such as cervical spondylosis.

HOW DO THEY WORK?

- **Limiting undesirable movement**
This relieves pain and promotes Healing
- **Unloading of spine and muscles**
Provides rest and fosters recovery
- **Maintaining alignment**
Ensures healing occurs in proper alignment
- **Mild traction-like effect**
Allows vertebral discs to recede back in place, relieving symptoms of nerve root compression

PROVEN BENEFIT:

Cervical collars as a treatment modality have shown statistically significant reductions in neck pain, with this study using a similar semi hard neck collar:
